Hi Jason,  
Hope all is well.  
Can someone please create a box layout showing how many of these packages can fit into the MVE 1879P two-divider turn tray? Please see specs below. I've attached our 2-divider turn tray spec dimensions for reference. As an FYI we offer the MVE VARIO L2 1879 freezer, part number, 20969058. It is a custom-made freezer with a unique designed 2-divider turn tray.

Please see below:  
Please provide total number of vaccine boxes shown below that we can fit in the Vario 2-divider turn tray. Vaccine boxes come in packages of (3). The height for (3) is, 185 mm (7.2 inches) and the width and depth 243 mm (9.6 inches) x 250 mm (9.8 inches). Buzz needs this today, please 😊

**Pizza boxes (approx 64 vials / box)**

- Actual height: 185 / 3 = 62 mm
- Actual width: 243 x (250) x 243 – (Dimension 250 when not compressed)
- Weight approx.: 1,3 kg Weighted on scale with filling 6,6 ml WFI

Weight of vial: est'd 18,6 g

Much appreciated!  
Stay safe!  
  
Thanks  
Ramón

Hi Ramon,

I need you to provide me with the total number of vaccine boxes shown below we can fit in the Vario 2 divider. I think the 2 divider is the appropriate model to maximize the capacity. This is a large project with Cryoport Systems and we do not have much time. I am on PTO Monday through Thursday next week and need to get them information today so I can address any questions. Please send me the estimate along with the math by the end of the day today.

They come in packages of (3). The height for (3) is 185 mm and the width and depth 243 mm x 250 mm. I do believe we may need special racks to withdraw them. Let's at least get an estimate without racks that can then be refined.

Thanks.

**Pizza boxes (approx 64 vials / box)**

- Actual height: 185 / 3 = 62 mm
- Actual width: 243 x (250) x 243 – (Dimension 250 when not compressed)
- Weight approx.: 1,3 kg Weighted on scale with filling 6,6 ml WFI

Weight of vial: est'd 18,6 g

Best Regards,

**Buzz Bies**
